Username and passwords to be provided by Market Operations team

DFM Equator testing

DFM Equator test system is available 10am to 9pm*

Username and passwords to be provided by Market Operations team

*Timings relate to Dubai time (GMT+4)

Member + Vendor Software Testing

Members, software vendors and market data vendors are able to develop and test their proprietary applications during this phase. Network and Application support queries should be directed to IT Connectivity Support team.

Member + Vendor Conformance Testing

Members and software vendors developing proprietary applications for order entry will need to complete conformance tests with NASDAQ Dubai to ensure their software has been developed correctly. These tests will confirm the expected behaviour after placing certain order types etc. Conformance tests and submittal of the certification must be complete by before go live. No conformance test is required for the DFM Trader Workstation. To schedule the conformance test, please contact our Market Operations team.

Member Mock Trading

Members will be able to perform trading functions on the DFM X Stream system as they would in the production environment. All Members and ISVs are encouraged to participate in Mock Trading. Mock trading will also include the Equator settlement system

Member MPS Testing

Members will be able to test their interaction with the NASDAQ Dubai market place service, and familiarise themselves with the practice of placing orders using this method of access to the NASDAQ Dubai market. To schedule the MPS test, please contact our Market Operations team.

Member Trader Workstation Testing

Members will be able to test their interaction with the DFM Trader Workstation, and familiarise themselves with the practice of placing orders using this method of access to the NASDAQ Dubai market. To schedule the test, please contact our Market Operations team.
